**Six Flags "Behind the Ride" Tour**

**SPRING FEVER AT SIX FLAGS ENGINEERING**

Presentation and tour by Nelson Boyd and colleagues

Tuesday, May 14th - at noon  
A Joint Meeting of the Atlanta Chapters of  
**SME & ASM International**

**A Dream-Come-True opportunity for those who always wanted to know  
just how these fantastic rides are designed, built and work.**

What a perfect way to celebrate spring fever, with a behind the scenes look at a favorite summertime venue: We will tour the engineering department of Six Flags Over Georgia and its newest ride creation. Mr. Nelson Boyd and his colleagues will offer a close up view of the electrical and mechanical systems that make this sophisticated roller coaster both an engineering marvel and a helluva ride. Discussions will include the safety systems, operating controls, design and construction of rides and any questions you may have.

**Reservations: Please RSVP with SME Atlanta Chapter Chairman Ben Harbin at 770-455-0676 ext 121, or [benh@t-tech.com](mailto:benh@t-tech.com), by Friday May 10th.**

We are asked to indicate that we are from ASM, and to state how many people we each will be bringing.

**Directions:** The SME & ASM members and guests will assemble at the Six Flag's employee entrance. From Atlanta, go west on I-20 past the usual entrance to the Park to exit 46A, Riverside Parkway. You will enter

Riverside Parkway in the correct direction. After 1/2 mile, turn left into the employee entrance (at 275 Riverside Parkway). Proceed to a stop sign and turn right to the Six Flags Security Post. Tell the guard that you are with the SME-ASM tour.
